Summary

Final year B.Tech CSE student at IGIT Sarang (GPA: 9.16/10) with hands-on experience across 2 AI/ML internships building LLM-powered systems, computer vision pipelines, and real-time inference services. Seeking AI/ML engineering or SDE roles.

Education

Indira Gandhi Institute of Technology (IGIT), Sarang

Aug 2023 – May 2027

B.Tech in Computer Science and Engineering

GPA: **9.16 / 10.00**

Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning, Artificial Intelligence, Deep Learning

Experience

Central Tool Room & Training Centre (Govt. of India)

June 2025 – July 2025

AI/ML Intern

Bhubaneswar, India

- Built end-to-end ML pipelines for face recognition (preprocessing, feature extraction, model training, evaluation, deployment); improved CNN accuracy by 25% through data augmentation and hyperparameter tuning.
- Designed low-latency inference services achieving sub-second response times; conducted error analysis under varying lighting, pose, and image quality conditions.

Infosys Springboard

Dec 2025 – Feb 2026

AI/ML Intern

Remote

- Designed and developed an AI + LLM powered stock screening system enabling natural language queries over 50,000+ historical stock records using intent parsing achieving 90% accuracy.
- Developed reusable Python modules for training, validation, and experiment tracking; implemented data preprocessing and feature engineering workflows.

Projects

Second Brain AI System

github.com/Debasis-Behera4143/GM-Studios-Second-Brain

Python, FastAPI, React (Vite), SQLite, SQLAlchemy, ChromaDB, Sentence Transformers, Ollama (Mistral), Pydantic

- Built a full-stack RAG-based personal knowledge management system: notes stored in SQLite via SQLAlchemy, embedded with all-MiniLM-L6-v2, and indexed in ChromaDB for semantic vector retrieval.
- Integrated Ollama (Mistral) as a zero-cost local LLM backend; served via FastAPI + Uvicorn with a React/Vite frontend enabling conversational Q&A over saved notes.

AI-Powered Stock Screener & Advisory Platform

github.com/Debasis-Behera4143/AI-Powered-Stock-Screener

Python, PostgreSQL, Redis, Kafka, MLflow, Docker

- Designed an AI system enabling natural language queries over 50,000+ historical stock records using LLM-based intent parsing and PostgreSQL.
- Implemented near real-time inference pipelines using Kafka and Redis, reducing response latency by 30%; built modular pipeline components tracked with MLflow.

Smart Attendance Management System

github.com/Debasis-Behera4143/Smart-Attendance-System

Python, OpenCV, TensorFlow, CNN, Flask

- Developed a CNN-based face recognition system achieving 93% accuracy; implemented a complete CV pipeline for automated attendance logging and deployed via Flask for institutional portal integration.

Technical Skills

Programming Python, SQL, C++, Java

AI / ML Supervised & Unsupervised Learning, CNNs, NLP, Feature Engineering, Hyperparameter Tuning, Model Evaluation

RAG & GenAI Sentence Transformers, ChromaDB, Ollama, RAG, Prompt Engineering, Vector Databases

Frameworks FastAPI, Flask, React, TensorFlow, PyTorch, Scikit-learn, OpenCV, Kafka, Docker, MLflow

Databases PostgreSQL, SQLite, MongoDB, Redis, AWS (EC2, S3)

Dev Tools Git, GitHub, Jupyter Notebook, Pandas, NumPy, SQLAlchemy, Pydantic

Leadership & Achievements

- Tech Lead, GeeksforGeeks Campus Body:** Conducted workshops on Machine Learning, NLP, and Computer Vision for 50+ students.
- Competitive Programming:** Solved 100+ problems on LeetCode. **Postman API Student Expert.** Completed Deloitte Technology Consulting and Tata GenAI virtual simulations on Forage.
